

Bickers
Your glueing expert

*“We glue **QUALITY**:
steadily and quickly, without rejections.”*

**GLUEJET® - the machine
for perfect & profitable
displays and packaging.**

DON'T STICK TO HANDMADE

BICKERS GLUEJET® pushes profit and quality - automatically!

You know, your profit depends on costs per unit of each POS-display or packaging. Calculate again, because the GLUEJET® brings speed and quality to your production.

Extremely versatile, easily programmable for fast makeready and easy to operate, the XY-glueing table applies any kind of special glue - hot and cold, just according to your needs.

MAXIMUM FLEXIBILITY

High savings on glue and man-hours due to precise machine controlled application.

SAVES COSTS

Compared to glueing by hand, the GLUEJET® has the unbeatable advantage of a constantly high bonding quality and speed - regardless of the experience of your production team.

ACHIEVES HIGH QUALITY BONDING

The ergonomic design is user friendly for your employees. Your workers will love the GLUEJET®!

IS ERGONOMIC

At the same time, the GLUEJET® sets a constant production pace due to its clock-actuated output.

PRODUCES CONSISTENTLY

Sound like a **PROFIT-MAKER?**

We are happy to talk personally about your requirements.

By the way: We are building each GLUEJET® as an integrated solution for customers worldwide. More than 35 years of experience show, we from BICKERS are your glueing expert!

GLUEJET® Your "Jet" to PROFIT and PERFECTION!

Speed:

NOW: 0.1 to 2 m/sec – freely adjustable as pace setter for your production – up to 2.8 m/sec traversing speed

Material:

- Corrugated, Cardboard, Paper, Foam, Foil, etc.
- also laminated or varnished surfaces - we are happy to advise you

Glue head:

- bead application for hot melt and cold glue
- spray application for hot melt
- optional: spray application for cold glue*

Programming:

- easily via touch screen and joystick
- optional: DXF-programming directly via CAD-software*

Lifting table:

- integrated hydraulic or electromechanic lifting table, also centrally divided
- automatic height adjustment guarantees precise glue application
- stack heights 840 mm or 350 mm

Sizes:

- 1300 x 1800 mm
- 1700 x 1800 mm
- 1700 x 2500 mm
- 2000 x 3000 mm

Remote assistance:

- quick remote assistance via integrated modem, free of charge even after the guarantee*

Working stations:

- 1 - 4 working stations
- processing of up to four different products at the same time
- ergonomic design for better working conditions

Operation:

- operation beside the machine via touch display, self explanatory even for unskilled workers
- 995 memories for automatic retrieval in case of repetitive orders

Flexibility:

- XY-plotter allows almost every geometric shape of glue application
- Machine is freely accessible and adapts to your workflow

GLUEJET® PAI2
with integrated hydraulic
lifting table: capacity 840 mm.

GLUEJET® PI2
with integrated electro-mechanic
lifting table: capacity 350 mm.

Hot melt applicator head HM-X* for
precise bead and spray application.

Highest safety standards permit free
access to the machine.

Repositioning cylinders fix the product
for a precise glue application.

Cold glue applicator heads KR and KS*
for hot/cold glueing in one cycle.

You can produce on up to four working places simultaneously.
