

Delivering innovative  
print finishing solutions  
& service

**digicon** **lite 3**

# digicon lite 3

The digicon lite 3 is *the* entry level, compact digital finishing solution to meet your customers' needs.

Now even more productive - running faster at 64 m/min in semi rotary - you can create extra capacity, allowing larger spec finishing machines to be reserved for more complex jobs, with the Lite taking care of the day-to-day work.

Extremely user friendly, and available with various options, including cold foiling, super varnish, Autoslit, Iscore and sheeter, it is capable of running in line (R to L operation only), offering a perfect balance between size and performance. Plus, it's built to the same exacting standards as the larger Digicon Series 3, backed up by worldwide support from the market leader.

**Whether you need an economical, smaller solution or additional digital finishing capacity - the digicon lite 3 is *the* compact machine for you.**
